Lumbar Spine MRI Awareness

28 March 2015

Presented by: Various speakers

Spinal imaging is evolving in terms of its clinical uses and availability. Of the range of imaging modalities MR is the gold standard for investigating back pain that does not resolve or comes with the possibility of underlying pathology. This seminar will provide a basic appreciation of the role of MRI from its foundations to its relevance in care, with a chance to experience hands-on interpretation.

Please book online at www.aecc.ac.uk/cpd

	Early Bird	After 13/02/15
AECC GA/TAM/EAC/RCC	£ 80	£100
